

App. No. 10/605,176

EX PARTE INTERVIEW

Applicant requests an interview with the Examiner to discuss any potential questions or issues that the Examiner may have prior to the next Office Action.

REMARKS - General

Based on the conversation with the Examiner, the claims have been modified to add that the vehicle locator swivel plate pivots in a vertical plane and on a pivot bolt. These changes distinguishes the current invention from Alvis (US 5,468,155) which rotates on an horizontal plain and does not have a pivot bolt attached. Applicant has also removed the means language from the claims. Applicant has made corrections per Examiner's comments on Pages 3 and 4 based on 35 USC §112.

Also applicants have rewritten all claims to define the invention more particularly and distinctly so as to overcome the technical rejections and define the invention patentably over the prior art.

Conclusion

For all of the above reasons, applicant submits that the specification and claims are now in proper form, and that the claims all define patentably over prior art. Therefore the applicant submits that this application is now in condition for allowance, which action is respectfully solicited.

Respectfully submitted,

Jeffrey M. Furr, Esq.
